

Oppsett av RDP for nettbrett & mobiltelefoner med Android

Denne brukerveiledningen viser hvordan du kan koble deg til terminalserveren fra nettbrett og mobiltelefoner med Android OS.

RDP-klienten du skal bruke heter «Microsoft Remote Desktop», appen er gratis og kan lastes ned fra «Google Play». Link: <https://play.google.com/store>

Microsoft Remote Desktop

Microsoft Corporation Jobbrelatert

PEGI 3

Når du har lastet ned appen til nettbrettet eller mobiltelefonen din så starter du RDP-klienten ved å trykke på ikonet «RD Client».

Trykk på «Accept» og deretter på + tegnet øverst til høyre i vinduet:

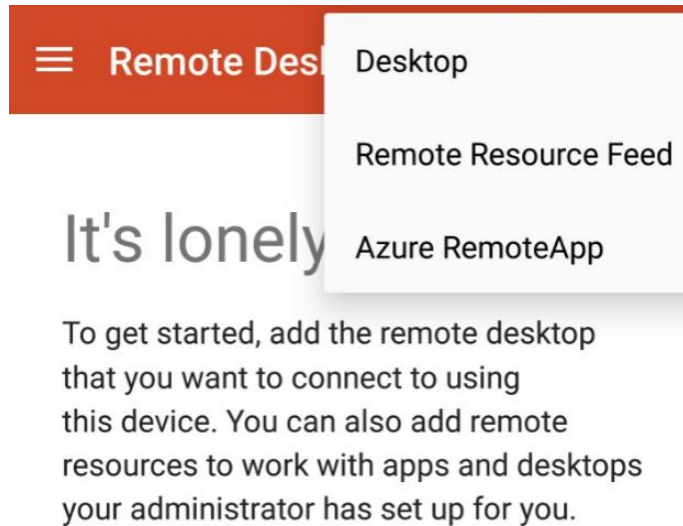

☰ Remote Desktop

It's lonely here.

To get started, add the remote desktop that you want to connect to using this device. You can also add remote resources to work with apps and desktops your administrator has set up for you.

Trykk på «Desktop»:

Remote Des

- Desktop
- Remote Resource Feed
- Azure RemoteApp

It's lonely

To get started, add the remote desktop that you want to connect to using this device. You can also add remote resources to work with apps and desktops your administrator has set up for you.

Trykk på «Add manually»:

Desktop detection

Choose one of these desktops. If you don't see or recognize the desktop you want, add one manually.

Gateway

No gateway

Add gateway

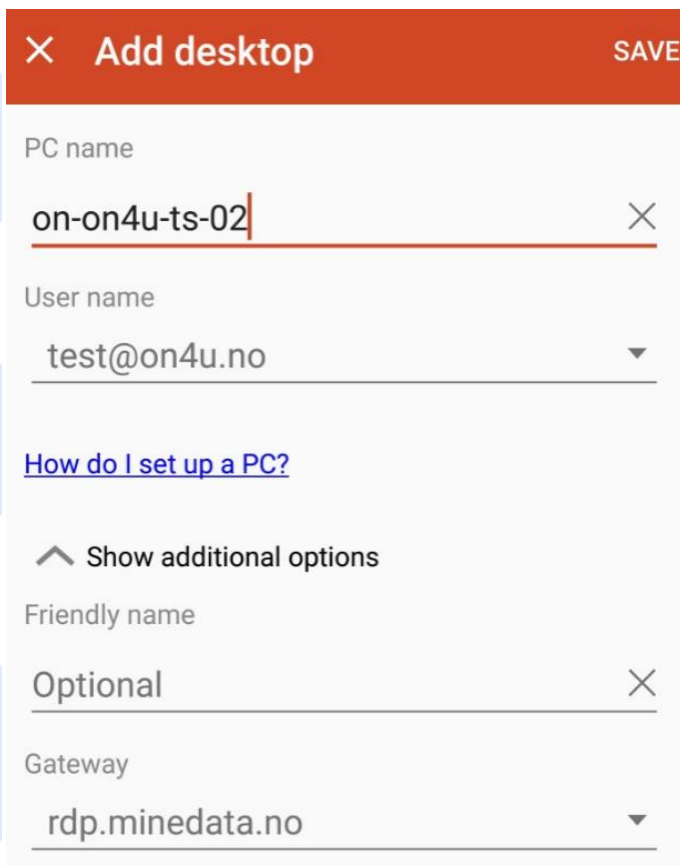

Customize display resolution
Off

Velg "Add gateway" → Legg til: rdp.minedata.no → Trykk på "Save".

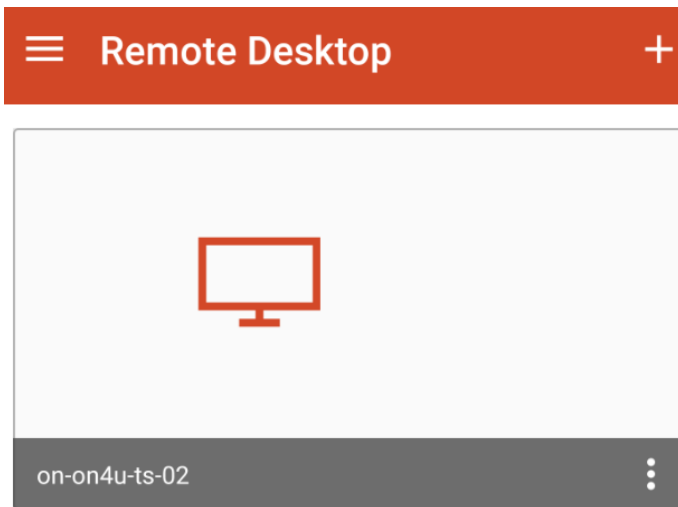

The screenshot shows a mobile application interface. At the top, there is a dark red header with a close button (X) on the left and the text "Add desktop" in the center, and a "SAVE" button on the right. Below the header, there are two input fields: "PC name" with the value "on-on4u-ts-02" and "User name" with the value "test@on4u.no". A white modal dialog box titled "Add gateway" is overlaid on top. It has a "Server name" field with "rdp.minedata.no" and a "User account" dropdown menu with "test@on4u.no" selected. At the bottom of the modal, there are "CANCEL" and "SAVE" buttons.

Trykk "Save" en gang til:

The screenshot shows the same mobile application interface as before, but the "Add gateway" modal is no longer present. The "PC name" field still contains "on-on4u-ts-02" and the "User name" field still contains "test@on4u.no". Below the "User name" field, there is a blue link that says "How do I set up a PC?". Below that, there is a chevron icon and the text "Show additional options". Below that, there is a "Friendly name" field with the value "Optional". At the bottom, there is a "Gateway" dropdown menu with "rdp.minedata.no" selected.

Trykk på terminalservernavnet:

Huk av for «Don't ask me again for connections to this computer» og trykk på "Connect":

Certificate can't be verified

You are connecting to:

on-on4u-ts-02

Name in certificate from the remote PC:

on-on4u-ts-02.on.local

It may not be safe to connect to this PC because of the following reasons:

- Not from a trusted certifying authority

Do you want to connect anyway?

- Don't ask me again for connections to this computer
